Cancer Studio
Publisher:
Cancer-VR
Release Date: 30 Apr, 2019

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7/Windows 8/Windows 10

Processor: intel i5-4590,

English,Japanese,Simplified Chinese,Traditional Chinese

Wow, I'm sorry, but did I play the same game that others did? I played this on the HTC Vive, and the Oculus Rift, did not bother with WMR because if it was broken on the Vive as it's core supported platform. I use the word broken because I am not entirely sure if it's actually broken, or simply very bad execution. I know, it's only just over a buck, but putting something out there with this poor of an experience is just bad form in my opinion. Angry Birds was just a buck at one point too. Given that it is not marked Early Access or school project and thus supposed to be a finished product it is, in my opinion, a travesty to be taking anyone's money. I will respect the thumbs up here, but wow, don't say I didn't tell you, I feel like my buck is still worth

something that's not an obvious asset flip and minimal effort.. Wow, I'm sorry, but did I play the same game that others did?
